DESCRIPTION

A rare and great opportunity to purchase one of these rare classics , with only around 60 left on UK roads and usually for sale at a much higher price if at all. This car has had around £6000 spent in recent years on mechanical maintenance , it drives and performs well and has a MOT until January. The bodywork is the real area that needs some attention as photographed. This car is being offered for sale as a trade sale and a project car that needs work please satisfy yourself of this if looking to purchase , this is not one of our usual retail cars that comes with any kind of warranty. Any potential buyer is welcome to come and spend as long as they like to look at the car at our premises in Bridgwater. Be quick im sure this won't be around long.
